Top Skills

MERN Stack
Knex.js
Postman API

Certifications

Goldman Sachs - Risk Job Simulation
AI Fluency: Framework & Foundations
Full Stack Food Delivery Project

Hiren Trivedi

SDE at @IBM ISL | IIITA'26 | Full stack Developer | Knight at Leetcode | 4## at Codechef | Specialits at Codeforces
Greater Jaipur Area

Summary

I currently work as a Software Engineer at IBM, having transitioned from an SDE Internship, where I contribute to real-world engineering problems at scale. I hold a strong foundation in Software Development, Data Structures & Algorithms, and Web Technologies from my time at IIIT Allahabad. Across the stack, I've built with MERN, Next.js, Prisma, and Supabase — shipping projects like an AI-driven Car Marketplace and a Food Delivery Platform.
On the data side, I developed an Oil Spill Detection system using Sentinel-1 SAR imagery in MATLAB, achieving 92% accuracy. I've sharpened my problem-solving through competitive programming — Knight on LeetCode, 4★ on CodeChef, and Specialist on Codeforces — and rounded out my profile with the Goldman Sachs Risk Job Simulation and an AI Fluency certification. I'm driven by curiosity and consistency, and I thrive in collaborative, fast-paced environments where technology and problem-solving create real-world impact.
Interests: Software Engineering | Product Development | Data Analysis | System Design | Machine Learning | Web Applications

Experience

IBM
10 months

Software Engineer
August 2026 - Present (3 months)
India

SDE Intern
January 2026 - Present (10 months)
India

Education

Indian Institute Of Information Technology Allahabad
Bachelor of Technology - BTech · (July 2022 - July 2026)

SHIV JYOTI SR. SEC. SCHOOL, KOTA
Class 12, RBSE · (May 2020 - May 2021)

Springdale Sr. Sec. School Sagwara
Class10th · (July 2018 - July 2019)
